

CALL FOR PAPERS: SPECIAL ISSUE ON
“TRENDS AND DEVELOPMENTS IN NATURAL FIBER COMPOSITES”

About the Journal

Applied Science and Engineering Progress (ASEP) is an International open-access scientific journal, free of charge, published by King Mongkut's University of Technology North Bangkok (KMUTNB) under the leadership of Prof. Dr.-Ing. habil. Suchart Siengchin, President of KMUTNB. ASEP is currently indexed in Scopus, TCII, ACI, Google Scholar, Publons, Researchgate, and CrossRef.

Scope of Special issue

Natural fiber composites play a significant role in the everyday pattern of human civilization. In the past decade, tremendous research works were reported on novel natural fibers and their composite materials. In addition, we see an increase in patents on natural fiber composite materials owing to the growing demands of these materials. In this regard, the main aim of the special issue includes new and recent advances in natural fibers and their composites. This special issue will be a collection of 10-15 peer-reviewed contributions that present original breakthrough research in the field of natural fiber-reinforced composites. Moreover, the special edition expects to provide a platform to publish cutting edge research from around the globe.

Manuscript Submission Information

Manuscripts should be submitted to Editorial Manager (EM) submission powered by Elsevier and Aries. Manuscripts can be submitted until the deadline. All manuscripts are thoroughly refereed through a double-blind peer-review process. Accepted papers will be published in the special issue of the journal and indexed in Scopus. Original research and review articles are invited with maximum word limit for each paper not exceeding 3000-4000 words. Submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere (including conference proceedings papers). A guide for authors and other relevant information for submission of manuscripts is available on the Instructions for Authors page (<https://www.editorialmanager.com/asep/default.aspx>). Kindly note that during the submission, the author should mention the paper belongs to special issue in the comment section of EM link.

Special issue articles are sought in the following areas (not limited):

- Fracture Mechanics
- Surface Modification Techniques
- Long-term Durability
- Mechanical Performance
- Physical and Chemical Analysis
- Tribology
- Thermal & Dynamic Properties
- Advanced Manufacturing Processes
- Applications
- Future Directions

Important dates

- First draft – April 15th 2021
- Decision on Submission– May 2021
- Revised draft – June 2021
- Acceptance and Notification – June 2021
- Publication– August 2021
